522191

Ossoff-Pilling® Micro-Laryngoscope, Adult Male

Description:

The new Ossoff-Pilling Micro-Laryngoscope is available in two proximal widths. The 25.5 mm width (522191) can be introduced in most patients and is easily aligned with the microscope (400 mm objective). The 19 mm scope (522190) has the narrowest width capable of absorbing both microscope sight lines and can be used in most patients who previously could accept only the original Holinger scope.

• Holinger distal end, ease of introduction, excellent visualization.
• 19 or 25.5 mm proximal widths, increases patient selection for micro procedures.
• Standard adult handle, can be used with most suspension systems, B.U. suspension handle available as option.
• Single light carrier, external tube dimensions are kept to a minimum.
• Laser finish, laser safety.
• Supplied with one light carrier. Cable sold separately

522191: Ossoff-Pilling Micro-Laryngoscope, Adult Male Overall length **168 mm**, Min Distal Opening **8.0 mm**, Nominal Proximal Dims **24.0 mm x 14.0 mm**, Replace Carrier 527865
